No. 1 (pp 1–104) published April 16, 1987
No. 2 (pp 105–198) published May 7, 1987
No. 3 (pp 199–304) published June 12, 1987
No. 4 (pp 305–394) published July 6, 1987
No. 5 (pp 395–494) published August 5, 1987
No. 6 (pp 495–596) published September 1, 1987

Mini-review

Schmid RD: "Biotechnology Abstract Analyser". A rapid computerized screening for leaders, institutes' hierarchies, cooperations and research trends 395

Biotechnology

Akino T, Nakamura N, Horikoshi K: Production of β-mannosidase and β-mannanase by an alkalophilic *Bacillus* sp. 323

Atlan D, Portalier R: Purification of extracellular alkaline phosphatase released by *Escherichia coli* excretory mutants 318

Bajpai P, Margaritis A: Kinetics of ethanol production by immobilized *Kluyveromyces marxianus* cells at varying sugar concentrations of Jerusalem artichoke juice (Short contribution) 447

Batsalova K, Kunchev K, Popova Y, Kozhukharova A, Kirova N: Hydrolysis of lactose by β-galactosidase immobilized in polyvinylalcohol 227

Campagna R, Bückmann AF: Comparison of the production intracellular L-phenylalanine dehydrogenase by *Rhodococcus* species M4 and *Sporosarcina ureae* at 50 liter scale 417

Dalili M, Chau PC: Intraparticle diffusional effects in immobilized cell particles 500

Eikmeier H, Rehm HJ: Stability of calcium-alginate during citric acid production of immobilized *Aspergillus niger* 105

El-Sayed A-HMM, Rehm HJ: Semicontinuous penicillin production by two *Penicillium chrysogenum* strains immobilized in calcium alginate beads 211

El-Sayed A-HMM, Rehm HJ: Continuous penicillin production by *Penicillium chrysogenum* immobilized in calcium alginate beads 215

Ettalibi M, Baratti JC: Purification, properties and comparison of invertase, exoinulinases and endoinulinases of *Aspergillus ficuum* 13

Evans CT, Peterson W, Choma C, Misawa M: Biotransformation of phenylpyruvic acid to L-phenylalanine using a strain of *Pseudomonas fluorescens* ATCC 11250 with high transaminase activity 305

Förberg C, Häggström L: Effects of cultural conditions on the production of phenylalanine from a plasmid-harboring *E. coli* strain 136

Fuska J, Proksa B, Khandiová A, Šturdíková M: Microbial transformations of cardioglycosides 313

Gòdia F, Casas C, Castellano B, Solà C: Immobilized cells: behaviour of carrageenan entrapped yeast during continuous ethanol fermentation 342

Grajek W: Comparative studies on the production of cellulases by thermophilic fungi in submerged and solidstate fermentation 126

Grajek W, Gervais P: Effect of the sugar-beet pulp water activity on the solid-state culture of *Trichoderma viride* TS 537

Günther H, Simon H: The use of pig heart dihydrolipoamide dehydrogenase (diaphorase) for the regeneration of NADH or NAD 9

Habets-Crützen AQH, de Bont JAM: Effect of various cosubstrates on 1,2-epoxypropane formation from propene by ethene-utilizing Mycobacteria 434

Hommel R, Stüwer O, Stuber W, Haferburg D, Kleber H-P: Production of water-soluble surface-active exolipids by *Torulopsis apicola* 199

Hummel W, Schütte H, Schmidt E, Wandrey C, Kula M-R: Isolation of L-phenylalanine dehydrogenase form *Rhodococcus* sp. M4 and its application for the production of L-phenylalanine 409

Ide JA, Park RJ, Leppik RA, Dunn NW: *Pseudomonas* mutants able to accumulate phenolic and catecholic 9,10-secosteroids from bile acids 234

Kekos D, Galiotou-Panayotou M, Macris BJ: Some nutritional factors affecting α-amylase production by *Calvatia gigantea* 527

Křen V, Ludvik J, Kofroňová O, Kozová J, Řeháček Z: Physiological activity of immobilized cells of *Claviceps fusiformis* during long-term semicontinuous cultivation 219

Lebrihi A, Germain P, Lefebvre G: Phosphate repression of cephamycin and clavulanic acid production by *Streptomyces clavuligerus* 130

Lee F-JS, Hassan HM: Biosynthesis of superoxide dismutase and catalase in chemostat culture of *Saccharomyces cerevisiae* 531

Mahmoud W, Rehm HJ: Chlortetracycline production with immobilized *Streptomyces aureofaciens*. I. Batch culture 333

Mahmoud W, Rehm HJ: Chlortetracycline production with immobilized *Streptomyces aureofaciens*. II. Semicontinuous and continuous fermentation 338

Manresa A, Espuny MJ, Guinea J, Comelles F: Characterization and production of a new extracellular polymer from *Pseudomonas* sp. GSP-910 347

Matsunaga T, Kamiya S: Use of magnetic particles isolated from magnetotactic bacteria for enzyme immobilization 328

Mazumder TK, Nishio N, Fukuzaki S, Nagai S: Production of extracellular vitamin B-12 compounds from methanol by *Methanosarcina barkeri* 511

Mes-Hartree M, Yu EKC, Reid ID, Saddler JN: Suitability of aspenwood biologically delignified with *Phebia tremellosus* for fermentation to ethanol or butanediol 120

Müller B, Schlichting E, Bischoff L, Schügerl K: Reactive extraction of penicillin G in a pilot plant Karr-column. I. Model media 36

Müller B, Schlichting E, Bischoff L, Schügerl K: Reactive extraction of penicillin G in a pilot plant Karr-column. II. Fermentation broths 206

Nagar-Legmann R, Margalith P: A comparative study of the lipid composition of yeasts with different fermentative capacities 49

Nowakowska-Waszczuk A, Sokołowski A: Application of carbon balance to submerged citric acid production by *Aspergillus niger* (Short contribution) 363
Okada T, Sonomoto K, Tanaka A: Application of entrapped growing yeast cells to peptide secretion system 112
Parascandola P, Scardi V, Tartaglione O: Immobilization of yeast cells by adhesion on tuff granules 507
Persson A, Molin G: Capacity for biosurfactant production of environmental *Pseudomonas* and *Vibrionaceae* growing on carbohydrates 439
Plant AR, Clemens RM, Daniel RM, Morgan HW: Purification and preliminary characterization of an extracellular pullulanase from *Thermoanaerobium* Tok6-B1 427
Reslow M, Adlercreutz P, Mattiasson B: Organic solvents for bioorganic synthesis. 1. Optimization of parameters for a chymotrypsin catalyzed process 1
Rhodes MJC, Smith JI, Robins RJ: Factors affecting the immobilisation of plant cells on reticulated polyurethane foam particles 28
Rokem JS, Zomer E: Scale up of the production of xylitol dehydrogenase and alcohol dehydrogenase from *Pachysolen tannophilus* grown on xylose 231
Rollo F, Amici A, Foresi F, di Silvestro I: Construction and characterization of a cloned probe for the detection of *Phoma tracheiphila* in plant tissues 352
Ropenga JS, Lenfant M: Bioconversion of isosorbide dinitrate into isosorbide mononitrate by the protozoan *Tetrahymena thermophila:* relationship to glutathione transferase levels 117
Rousseau P, Ricard C, Cameron J: Improvements in the fermenter growth of *Brucella abortus* strain 19 422
Sawada H, Suzuki T, Akiyama S, Nakao Y: Stimulatory effect of cyclodextrins on the production of lankacidin-group antibiotics by *Streptomyces* species 522
Schmidt D, Vasić-Rački D, Wandrey C: Enzymatic production of L-phenylalanine from the racemic mixture of D,L-phenyllactate. Modelling of the reactor 42
Sharma HSS: Enzymatic degradation of residual non-cellulosic polysaccharides present on dew-retted flax fibres 358
Shirai Y, Hashimoto K, Yamaji H, Tokashiki M: Continuous production of monoclonal antibody with immobilized hybridoma cells in an expanded bed fermentor 495
Tan KH, Gill CO: Utilization of substrates during batch growth of *Pseudomonas fluorescens* on olive oil, lard, and mutton tallow 443
Tan LUL, Yu EKC, Mayers P, Saddler JN: Column cellulose hydrolysis reactor: the effect of retention time, temperature, cellulase concentration and exogenously added cellobiase on the overall process 21
Vasavada AB, Hsieh DPH: Production of 3-acetyldeoxynivalenol by *Fusarium graminearum* R 2118 in submerged cultures 517

Applied Microbiology

Al Mahmood S, Giummelly P, Bonaly R: Structural modifications of mannans during flocculation of *Kluyveromyces bulgaricus* 462
Bagnara C, Gaudin C, Belaich JP: Physiological properties of *Cellulomonas fermentans,* a mesophilic cellulolytic bacterium 170
Ballongue J, Masion E, Amine J, Petitdemange H, Gay R: Inhibitor effect of products of metabolism on growth of *Clostridium acteobutylicum* 568
Bourbonnais R, Paice MG: Oxidation and reduction of lignin-related aromatic compounds by *Aureobasidium pullulans* 164
Bussineau CM, Keuer TA, Chu I-M, Papoutsakis ET: Effect of growth conditions on enzyme activities, intracellular kinetics and biomass yields of a new RuMP-type methylotroph (T15) 61
Cavazzoni V, Adami A, Craveri R: α-Galactosidase from the yeast *Candida javanica* 555
Chu I-M, Keuer TA, Papoutsakis ET: Formate transport, growth inhibition and the membrane protonmotive force in two methylotrophs (T15 and L3) 70
Debnath (Das) M, Majumdar SK: Effect of minerals on glucose isomerase production by *Streptomyces kanamyceticus* (Short contribution) 189
de L Moscoso I, Rosato YB: Extracellular enzyme production by haploids, heterocaryons and diploids of *Aspergillus nidulans* 365
De Mot R, Verachtert H: Regulation of the amylase secretion by the yeast *Filobasidium capsuligenum* and a 2-deoxy-D-glucose resistant mutant 258
Deobald LA, Crawford DL: Activities of cellulase and other extracellular enzymes during lignin solubilization by *Streptomyces viridosporus* 158
Dürre P, Kuhn A, Gottwald M, Gottschalk G: Enzymatic investigations on butanol dehydrogenase and butyraldehyde dehydrogenase in extracts of *Clostridium acetobutylicum* 268
El-Diwany AI, Selim MH, El-Shafei AM: Comparison of β-glucosidase activities in different *Debaryomyces* strains 552
Famelart M-H, Bouillanne C, Kobilinsky A, Desmazeaud M: Studies on *Brevibacterium linens* metabolism in fermentor 378
Flint HJ, Stewart CS: Antibiotic resistance patterns and plasmids of ruminal strains of *Bacteroides ruminicola* and *Bacteroides multiacidus* 450
Gay G, Debaud JC: Genetic study on indole-3-acetic acid production by ectomycorrhizal *Hebeloma species:* inter- and intraspecific variability in homo- and dikaryotic mycelia 141
Hamamoto A, Murooka Y: Plasmid vectors used in various strains of *Erwinia* species 242
Hansson G, Seifert G: Effects of cultivation techniques and media on yields and morphology of the basidiomycete *Armillaria mellea* 468
Iijima S, Kawai S, Mizutani S, Taniguchi M, Kobayashi T: On-off regulation of gene expression from tryptophan promoter with cross-flow filtration 542
Kimura K, Takano T, Yamane K: Molecular cloning of the β-cyclodextrin synthetase gene from an alkalophilic *Bacillus* and its expression in *Escherichia coli* and *Bacillus subtilis* 149
Nagata S, Feicht R, Bette W, Günther H, Simon H: On a viologen-dependent pyridine nucleotide oxidoreductase from a thermophilic *Bacillus* 263
Nešvera J, Hochmannová J, Holubová I, Čejka K: Transfer of IncW plasmids into methylotrophic bacteria by conjugation and mobilization 147
Nout MJR, Bonants-van Laarhoven TMG, de Jongh P, de Koster PG: Ergosterol content of *Rhizopus oligosporus* NRRL 5905 grown in liquid and solid substrates 456
Oosthuizen A, Kock JLF, Botes PJ, Lategan PM: The long-chain fatty acid composition of yeasts used in the brewing industry 55

Patterson MF, Damoglou AP: Conversion of the mycotoxin citrinin into dihydrocitrinone and ochratoxin A by *Penicillium viridicatum* 574
Peinado JM, Barbero A, van Uden N: Repression and inactivation by glucose of the maltose transport system of *Candida utilis* 154
Pfeifer TA, Khachatourians GG: The formation of protoplasts from *Beauveria bassiana* 248
Roberts DW, Dunn HM, Ramsay G, Sweeney AW, Dunn NW: A procedure for preservation of the mosquito pathogen *Culicinomyces clavisporus* 186
Smart J, Richardson B: Molecular properties and sensitivity to cations of β-galactosidase from *Streptococcus thermophilus* with four enzyme substrates 177
Stahl U, Leitner E, Esser K: Transformation of *Penicillium chrysogenum* by a vector containing a mitochondrial origin of replication 237
Suzuki Y, Oishi K, Nakano H, Nagayama T: A strong correlation between the increase in number of proline residues and the rise in thermostability of five *Bacillus* oligo-1,6-glucosidases 546
Ueno S, Miyama M, Ohashi Y, Izumiya M, Kusaka I: Secretory enzyme production and conidiation of *Aspergillus oryzae* in submerged liquid culture 273
van Schie BJ, Rouwenhorst RJ, de Bont JAM, van Dijken JP, Kuenen JG: An in vivo analysis of the energetics of aldose oxidation by *Acinetobacter calcoaceticus* 560
Votruba J, Pazlarova J, Dvořáková M, Vanatalu K, Váchová L, Strnadová M, Kučerová H, Chaloupka J: External factors involved in the regulation of an extracellular proteinase synthesis in *Bacillus megaterium*. The effect of glucose and amino acids 373
Welsh FW, Williams RE, Veliky IA: Organic and inorganic nitrogen source effects on the metabolism of *Clostridium acetobutylicum* 369
Whitfield D, Large PJ: Assimilatory reduction of trimethylamine *N*-oxide in the yeast *Sporopachydermia cereana* 277
Yu P-L, Smart JB, Ennis BM: Differential induction of β-galactosidase and phospho-β-galactosidase activities in the fermentation of whey permeate by *Clostridium acetobutylicum* 254

Environmental Microbiology

Azad HR, Davis JR, Schnathorst WC, Kado CI: Influence of verticillium wilt resistant and susceptible potato genotypes on populations of antagonistic rhizosphere and rhizoplane bacteria and free nitrogen fixers 99
Boopathy R: Inoculum source for anaerobic fermentation of coffee pulp 588
de Rome L, Gadd GM: Copper adsorption by *Rhizopus arrhizus, Cladosporium resinae* and *Penicillium italicum* 84
Doppelbauer R, Esterbauer H, Steiner W, Lafferty RM, Steinmüller H: The use of lignocellulosic wastes for production of cellulase by *Trichoderma reesei* 485
Friedrich J, Cimerman A, Perdih A: Mixed culture of *Aspergillus awamori* and *Trichoderma reesei* for bioconversion of apple distillery waste 299
Gurujeyalakshmi G, Mahadevan A: Degradation of guaiacol glyceryl ether (GGE) by *Bacillus subtilis* 289
Kirchner K, Hauk G, Rehm HJ: Exhaust gas purification using immobilised monocultures (biocatalysts) 579
Mörsen A, Rehm HJ: Degradation of phenol by a mixed culture of *Pseudomonas putida* and *Cryptococcus elinovii* adsorbed on activated carbon 283
Nicolini L, von Hunolstein C, Carilli A: Solid state fermentation of orange peel and grape stalks by *Pleurotus ostreatus, Agrocybe aegerita,* and *Armillariella mellea* 95
Nitta T, Sakai Y, Mori T: The role of *Trochilioides recta* in elimination of bulking 195
Obuekwe CO, Westlake DWS, Plambeck JA: Bacterial corrosion of mild steel under the condition of simultaneous formation of ferrous and sulphide ions 294
Obuekwe CO, Westlake DWS: Occurrence of bacteria in Pembina crude oil pipeline system and their potential role in corrosion process (Short contribution) 389
Rivers DB, Osborn JL, Emert GH: Biochemical oxygen demands of potential cellulose ethanol waste streams 91
Royse DJ, Schisler LC: Yield and size of *Pleurotus ostreatus* and *Pleurotus sajor-caju* as effected by delayed-release nutrient 191
Vandevoorde L, Verstraete W: Anaerobic solid state fermentation of cellulosic substrates with possible application to cellulase production 479
Westmeier F, Rehm HJ: Degradation of 4-chlorophenol in municipal wastewater by adsorptiv immobilized *Alcaligenes* sp. A 7-2 78
Whitmore TN, Lloyd D, Jones G, Williams TN: Hydrogen-dependent control of the continuous anaerobic digestion process 383
Yadav JS: Influence of nutritional supplementation on solid-substrate fermentation of wheat straw with an alkaliphilic white-rot fungus (*Coprinus* sp.) 474
